

Report for Ramsar COP11 on Good Practices for Enhancing Biodiversity in Rice Paddy Ecosystem in Japan, Korea and Other Asian Countries

CONTENTS

Foreword

a) Outline

- a-1) Findings from Researches for Organisms of Rice Paddies**
 - a-1-1) Biodiversity of Rice Paddies
 - a-1-2) Biodiversity in Rice Paddies
- a-2) Concept and Models of Integrated Biodiversity Management (IBM) in Rice Paddies**
 - a-2-1) Integrated Biodiversity Management (IBM) in Rice Paddies
 - a-2-2) Integrated Biodiversity Management in Paddy Fields: Shift of Paradigm from IPM toward IBM
- a-3) Inventory of Organisms in Rice Paddies**
 - a-3-1,2) Biodiversity in Rice Paddy (posters)
 - a-3-3-1,2) Inventory of Organisms in Rice Paddies (Fauna & Flora)

b) Comprehensive Reports

- b-1) Traditional Use and Availability of Aquatic Biodiversity in Rice-based Ecosystems (FAO)**
 - b-1-1) I. Kampong Thom Province, Kingdom of Cambodia
 - b-1-2) II. Xishuangbanna, Yunnan, People's Republic of China
 - b-1-3) III. Xieng Khouang and Houa Phan Provinces, Lao PDR
 - b-1-4) IV. Lai Chau and Hoa Binh Provinces, Viet Nam
 - b-1-5) V. Rice-fish Farming Tradition and Current Practices in Northwestern Viet Nam
 - b-1-6) Utilization of Aquatic Biodiversity in Mountainous Rice-based Ecosystems of China and Viet Nam
- b-2) Comprehensive Programs Based on Enhancing Biodiversity of Surrounding Rice Paddies of Kabukuri-numa Wetland**
 - b-2-1) Project for Achieving Co-existence of Rice Paddy Agriculture with Waterbirds at Kabukuri-numa, Miyagi Prefecture, Japan
 - b-2-2) Activities for Co-existing Rice Agriculture with Over-wintering Geese in Kabukuri-numa and Surrounding Rice Paddies
- b-3) Comprehensive Programs to Protect Rice Paddy Biodiversity in the Lake Biwa Watershed**
 - b-3-1) Practices for Conserving Paddy Field Biodiversity in the Basin of Lake Biwa, a Ramsar Wetland
 - b-3-2) The "Yurikago Suiden" Project: Has This Effort to Revive Paddy Fields as Fish Nurseries Succeeded?
 - b-3-3) Winter Flooding Provides a Habitat for Threatened Fish and Amphibians in a Hilly Area Paddy Field
 - b-3-4) Predation by Crucian Carp Larva/Fry Visualizes Biological Interactions of Paddy Field Community
 - b-3-5) Pioneer Studies on Some Microscopic Organisms: an Unknown Aspect of Species Diversity in Paddy Fields
 - b-3-6) An Important Factor Limiting the Distribution of Large Branchiopods in Shiga Prefecture, Japan: Moisture Content of Rice Paddy Soil in Winter
 - b-3-7) Aquatic Animal Assemblages Inhabiting the Rice Fields in Shiga Prefecture, Central Japan
 - b-3-8) Sustainability of "Rice of Takashima Ikimono Tambo" standing on Market Sympathy
- b-4) Environmental Construction of Municipal Communities for Co-existence with Waterbirds**
 - b-4-1) Social Development and Regional Regeneration through Re-introducing Oriental White Stork and Enhancing Biodiversity of Rice Paddy in Toyooka, Japan.
 - b-4-2) Sado's Satoyama in Harmony with Japanese Crested Ibis - The Sado GIAHS Project -
 - b-4-3) Osaki, the City Which Attracts Migratory Birds - its Efforts for Co-existence of Agriculture and Wildlife -
 - b-4-4) Project for the Nature-Symbiotic Community Development - Noda City, Chiba Prefecture
- b-5) Programs to Enhance Biodiversity of Rice Paddies in Tsunami Attacked Areas by Great East Japan Earthquake**
 - b-5-1) Tohoku Green Renaissance Projects - Rebuilding from 3.11 Disaster
 - b-5-2) Restoration from the Tsunami through Resilience of Ecosystem

c) Reports on Special Fields

- c-1) Soil Microbial Diversity**
 - c-1-1) Advocacy of Positive Environmental Assessment Using Soil Microbial Diversity and its Vitality Value
 - c-1-2) A New Index for Right Agriculture, "Soil Microbial Diversity *Vitality Value (SMDVV)"
 - c-1-3) Soil Microbial Diversity and Its Vitality Value - Vitalize Agriculture, Vitalize Local People -
