

(ふゆみずたんぼの歌)

Winter flooded rice field's forever

Words & Music **TAKUJI TANAKA**
Translation **AYAOKO TAKAHASHI**

1.

*Flying far from distant land to winter rice fields
You bring new life to Mother Land braving frozen air
We are happy one more time to see you back again
You give us all this wisdom and a dream to save the earth
Nature's dancing in the air, so take a closer look
Recognize the sense of wonder, our beautiful world
The future is in our hands, let us make a change
We wish for a better future in harmony and peace*

2.

*Dreaming of a snowy place, winter rice fields
You and I need each other, this is our fate
Flocks of geese flying in the sky tell me I'm so small
You teach me to be humble and to care for the earth
Home to many creatures, giving us the chance
to collect the seeds of the future, and bear us fruit
The future is in our hands, let us make a change
We wish for a better future in harmony and peace*

3.

*We share the same destiny on this planet earth
Let's give thanks to nature, and appreciate our world
The future is in our hands, let us make a change
We wish for a better future in harmony and peace
We wish for a better future in harmony and peace*

La la la ... la la la...la la la...la la la...
